Motorhomes

WildAx Motorhomes in partnership with Brook Miller Mobility have produced the **award winning Callisto Independence** - the UK's first standard model range wheelchair accessible motorhome. Using the Fiat Ducato 6.39m van as a base there is enough room to include everything found in much larger coach-built versions but still retain the ease of driving that a panel van gives. With many wheelchair users eligible for vat exclusion this is also a much more cost effective solution to motor homing than adaption's to an existing motorhome.

When ordering a WildAx motorhome remember that we build all our motorhomes especially for each customer. You are not choosing one off a forecourt therefore there are many options available to you. We will talk through all the possibilities with you to make sure that you get exactly what you need. At WildAx we use motorhomes ourselves regularly giving us the experience we need to help you build the right specification. With years of experience Brook Miller can also help you to get exactly the right mobility options to give maximum ease of use.

The Callisto has been designed as an open plan motorhome. The price quoted here is the finished motorhome without any mobility adaptations. We acknowledge that every customer requiring wheelchair access has differing individual needs for access and interior movement. To this end we consult with you at length and design a specification that meets your needs. This final price is then quoted from this specification.

Main features of the Callisto Independence

Access

Access to the Callisto is from a cassette underfloor sidelift which will lift the user up to floor level for entry and exit and stow away under the outside of the vehicle to leave the whole area behind the front two seats clear for wheelchair tie down or storage whilst travelling.

Winter Use

All WildAx motorhomes are designed to be used all year round. With full insulation in all areas, custom made 100 litre insulated water tanks with 12v frost heating are also fitted. Gas/Electric heating and hot water makes cold climates comfortable. Our customers have reported temperatures down to -15 degrees.

Wild Camping

Our motorhomes all have a standard a refillable LPG gas tank fitted under the chassis. This gives a very cheap source of habitation fuel and allows a greater independence than gas bottles. All lighting is LED to give a longer battery life when not on mains hook up.

Washroom

A large open wet room designed specifically to allow a wheelchair to roll through to access the toilet, shower and the sleeping area. With a flush mount shower tray custom manufactured by WildAx from extra strong fibreglass and a unique door system giving privacy and a watertight seal without the use of a shower curtain.

Kitchen

The large work top gives a useful cooking area. With an oven/grill and gas hob cooking full meals is easy! The fridge is a 3-way 90 litre fridge/freezer with full width freezer. Storage includes large pan drawer and sliding larder.

Living Area

Inside the sliding door is a large area to accommodate a wheelchair for travel purposes with optional lockdown points. A spacious sofa gives room to relax. A raised cab step gives a comfortable area so that the cab seats can be rotated and used for leisure seating.

Sleeping Area

In the rear area of the Callisto are two sofas with storage under that slide together in seconds to make a large double bed. This could also be left up to form a permanent bed. When folded up the walkway between the seats has been designed to accommodate a mobility scooter or wheelchair.

Storage

Large high level cupboards using our standard silent driving WildAx doors are round the top of the motorhome with storage under all the seats and a large space over the cab.

Mobility Adaption's

A vast range of adaption's are available for the Callisto and we offer a free consultation for each customer to ensure that their specific needs are met.

Some of the Adaption's include entry equipment, Under floor and inboard lifts, Driving controls from a simple steering Knob to full technical devices. Inside we can fit overhead hoists, electric beds etc.

We offer free no obligation home demonstrations please ring and ask our specialists.

If you don't see it - please ask!
